Comparing Integers Name _____

Key Concept and Vocabulary

-2 is less than 1 . $-2 < 1$
 1 is greater than -2 . $1 > -2$
 $-2 = -2$

-2 is less than 1. $-2 < 1$
 1 is greater than -2. $1 > -2$
 -2 is equal to -2. $-2 = -2$

PRACTICE MAKES PURR-FECT Check your answers at BigIdeasMath.com

Write the integers in order.

1. $-3, -2$
2. $-1, -6$
3. $5, 0$
4. $-5, 0$

5. **TEMPERATURE** What is the temperature in Fairbanks? -4 degrees

6. **TEMPERATURE** What is the temperature in Anchorage? 0 degrees

7. **TEMPERATURE** Circle the colder temperature.
 Fairbanks Anchorage

Copyright © Big Ideas Learning, LLC Topic 4.1

- Write the correct comparison symbol ($>$, $<$, or $=$) in each box.
- 1) 87 82
 - 2) 960 -208
 - 3) $-2,577$ $-2,174$
 - 4) 194 658
 - 5) $-458,840$ $-598,924$
 - 6) $-2,455$ $-4,178$
 - 7) -497 -171
 - 8) 243 315
 - 9) 49 -78
 - 10) $173,702$ $908,518$
 - 11) $26,570$ $-32,373$
 - 12) $744,430$ $272,878$
 - 13) $19,966$ $27,446$
 - 14) 86 -33
 - 15) $49,100$ $-99,244$
 - 16) $7,796$ $8,624$
 - 17) -75 -49
 - 18) $3,199$ $8,618$
 - 19) $165,687$ $972,775$
 - 20) $40,727$ $16,612$

Ordering Integers (A) Answers

Write each set of integers in the order shown.

greatest -3 18 11 15 15 11 -7 -3 18 -5 -5 -7 least	least -11 -20 -20 -11 17 -5 11 11 13 13 -5 17 greatest	least 5 -12 13 -4 -4 2 2 5 -12 13 17 17 greatest	least 15 -9 -9 -1 4 4 -1 13 19 15 13 19 greatest
greatest -3 20 -1 16 16 -1 -20 -3 20 -16 -16 -20 least	greatest -12 2 -11 -1 2 -9 -9 -11 -15 -12 -1 -15 least	least -6 -17 -17 -7 16 -6 1 1 -7 8 8 16 greatest	greatest -13 16 16 10 -1 5 5 -1 -18 -13 10 -18 least
least 12 -13 15 -10 -10 5 5 12 16 15 -13 16 greatest	greatest -18 5 -8 4 5 -1 -1 -8 4 -10 -10 -18 least	least -15 -19 18 -15 1 -5 -19 1 7 7 -5 18 greatest	greatest -8 19 8 18 18 8 -19 -8 -20 -19 19 -20 least

Integers practice worksheet with answers. Integers practice worksheet pdf.

If you remove the zeros, you don't change the answer at all. (i) -9(ii) -9(iii) +5(iv) -12(v) -2(vi) -3(vi). The maximum and minimum temperature of a city was 24°C and -4°C respectively. Alternatively, students can always convert subtraction questions to addition questions by changing the signs (e.g. $(-5) - (-7)$ is the same as $(-5) + 7$; $3 - 5$ is the same as $3 + (-5)$). All that is needed then is to add as many zeros (pairs of red and yellow chips) as needed until there are enough of the correct color chip to remove. You may also want to get one of those giant integer number lines to post if you are a teacher, or print off a few of our integer number lines. Summarized, they are $++ = +$; $-- = -$; $+- = -$; and $-+ = -$. Or want to know more information about Math Only Math. Write true or false for the given statements. (i) Zero is the smallest integer. Two-color counters are usually plastic chips that usually come with yellow on one side and red on the other side. You can also project them on your whiteboard or make an overhead transparency. 3 marks are awarded for each correct answer while 2 marks are deducted for each incorrect answer. If Nina answered 32 questions correctly and 3 incorrectly, how many marks did she get?(a) 96; (b) 80; (c) 72; (d) 90 Answers on 5th Grade Integers Worksheets are given below to check the exact answers of the questions. Answers:1. What was the difference between the maximum and minimum temperature?IX. In subtraction questions, the focus is on the subtrahend (the value being subtracted). You would model -5 with five red chips and 7 with seven yellow chips. Since there are a few confused faces in the audience, let us explain a little further. Compare the given and put the right sign or =. (i) -17 0(ii) -6 - 10 -10 + 6(iii) 45 -45(iv) -5 + 5 0(v) -12 -9(vi) +8 - 3 -3 + 8v. Read more about them below. We've included a few hundred integers worksheets on this page to help support your students in their pursuit of knowledge. Welcome to the integers worksheets page at Math-Drills.com where you may have a negative experience, but in the world of integers, that's a good thing! This page includes Integers worksheets for comparing and ordering integers, adding, subtracting, multiplying and dividing integers and order of operations with integers. II. (i) -71(ii) +42(iii) 71(iv) -3(v) -7(vi) -100(vii) -39.(viii) -9, -8, -7, -6.III. For homeschoolers or those with only one or a few students, the paper versions should do. When we say, the correct side, we mean use red for negative numbers and yellow for positive numbers. Adding and subtracting integers worksheets in various ranges including a variety of options for parentheses use. In other words, multiplying two positives or two negatives together results in a positive product, and multiplying a negative and a positive together results in a negative product. (ii) The smallest negative integer is -1.(iii) 0 is greater than -4.(iv) -16 is greater than -26.(v) -3 is to the right of 0 on a number line.X. Choose the right answer:(i) How many integers are there between -12 and 12?(a) 12; (b) 0; (c) 24; (d) 23(ii) Which of the given integers is greater than -5?(a) -11; (b) -4; (c) 11; (d) Both b and c(iii) Which of the given integers is smaller than -15?(a) -21; (b) 0; (c) -14; (d) 10(iv) The absolute value of -10 is.(a) +100; (b) -10; (c) +10; (d) 10(v) There are 40 questions in an examination. One hugely important reason is that there are many high school mathematics topics that will rely on a strong knowledge of integers and the rules associated with them. The other thing that we highly recommend are integer chips a.k.a. two-color counters. Write all the integers between the given numbers.(i) -7 and 0(ii) 0 and +5(iii) 3 and -3(iv) -12 and -8v. (i) 97(ii) -32(iii) -35(iv) 9(v) -7(vi) -14vii. In positive minus positive questions, if the subtrahend is greater than the minuend, the answer will be negative. There are many reasons why a knowledge of integers is helpful even if you are not going to pursue an accounting or deep sea diving career. (i) 6, -5, -4, -3, -2, -1(ii) +1, +2, +3, +4(iii) -2, -1, 0, +1, +2(iv) -11, -10, -9v. Use this Google Search to find what you need. Find the given integers:(i) Opposite of 71(ii) Opposite of -42(iii) |-71|(iv) 4 more than -7(v) 8 less than 1(vi) The predecessor of -99.(vii) The successor of -40.(viii) Four integers between -10 and -5.III. Adding or subtracting zero (a red chip and a yellow chip) has no effect on the original number, so we could add as many zeros as we wanted to the pile, and the number would still be the same. For example, in the question $(-2) + 5$, the absolute value of the positive integer is greater, so the sum will be positive. For example, $5 - (-5)$, would require five yellow chips to start and would also require the removal of five red chips, but there aren't any red chips! Thank goodness, we have the zero principle. In total, they have lost $3 \times (-5) = -\$15$. Mashing them together should be straight forward. In 5th Grade Integers Worksheet we will solve how to show the given integers on the number line, addition and subtraction of integers using number line, comparison of integers, absolute value of an integer, true or false statements of integers and word problems on integers. Next, remove the chips that would represent the second number from your pile and you will have your answer. In order to develop a deeper understanding of these rules, it is nice to think of an example from outside of school such as a bank and its loan clients. If the clients all paid back their loans, the bank would lose the 3 customers Mixed Operations with Integers Worksheets Integers worksheets with a mixture of four operations on the same page. From the clients' perspective, they each gained \$5, so they would all be in positive territory $3 \times 5 = \$15$. Vice-versa for both situations. More technically, it would be the integer with the greater absolute value. Find the value of the following:(i) $81 + 16$ (ii) $-20 - 12$ (iii) $20 - 55$ (iv) $-6 - 3$ (v) $-3 - 4$ (vi) $20 - 34$ vii. (i)
